

PROFILE

Software Engineer (Software Engineering graduate, 2026) with hands-on experience in **full-stack development** (Java/Spring Boot, .NET Core, Angular, Next.js/TypeScript), **DevOps** (Docker, CI/CD, monitoring) and **applied AI** (local LLM integration, RAG). I deliver end-to-end applications, from secured APIs to containerized deployment. At Capgemini Engineering (client: Safran), I built and delivered **AnalyseImpacte** on my own: a process cut from **3–5 days to under 10 minutes**, validated with a **100 %** success rate under load and **0 high-risk vulnerabilities** in an OWASP ZAP audit (1,686 attack requests).

PROFESSIONAL EXPERIENCE

- Capgemini Engineering (client: Safran)

Ariana, Tunisia

Software Engineer – Final-Year Internship

Feb 2026 – Jun 2026

- Designed and delivered solo **AnalyseImpacte** for **Safran**: reduced the update cycle of a certified **DO-178C (DAL A)** aerospace design document from **3–5 days to under 10 minutes**, across **4 Scrum sprints**
 - Full-stack: Java 21 / Spring Boot / Angular / SQLite** application with **JWT** authentication, **RBAC** roles, **Swagger**-documented REST APIs, a dashboard with charts, voice input and PDF/CSV export
 - DevOps: 9-stage Jenkins CI/CD** pipeline (SonarQube, Trivy, Nexus, **Docker**, automatic rollback) with **Prometheus/Grafana** monitoring; **100 %** success rate in **JMeter** load testing (50 concurrent users), **0 high-risk vulnerabilities** across 1,686 **OWASP ZAP** attack requests
 - AI**: hybrid pipeline combining a deterministic **AST** parser with a **local LLM** (Ollama, qwen2.5-coder) and **anti-hallucination guardrails** that reject any content absent from the source code; conversational copilot with 4-mode intent routing
 - Automated cross-impact classification (C code / requirements) across **4 severity levels**, with full DO-178C traceability and CSV export
- Crosschain Solutions

Tunis El Marsa, Tunisia

Software Engineer Intern

Jul 2025 – Sep 2025

- Developed and secured **REST APIs** (**JWT** authentication) in **Spring Boot** for a tokenized micro-donation platform
 - Wrote the technical specifications for **3 functional modules** after gathering requirements from stakeholders, unblocking sprint planning
- LézarD Com

Tunis, Tunisia

Final-Year Internship – Higher Technician

Feb 2023 – Jun 2023

- Delivered solo a full-stack guest-house rental application (**Spring Boot, Angular, Spring Security**) with a normalized **MySQL** data model

PROJECTS

- Intelligent Medical Assistant (multi-tenant SaaS):

Clinic management platform (patients, appointments, consultations, billing) with role-based access control, **Docker** deployment and **GitLab CI/CD**. *Tech:* Next.js, TypeScript, NextAuth, Tailwind CSS, Django, PostgreSQL
- CareerMatch – RAG-based HR Matching:

Semantic candidate-to-job matching engine reaching **90 %** scoring accuracy, generating 10 tailored interview questions with Llama 3.2, exposed via a **FastAPI** API. *Tech:* Python, Qdrant, Sentence-Transformers, Ollama, Docker Compose
- HR Application with AI:

Automated resume screening via a matching algorithm, an HR chatbot for candidates and employee well-being reporting. *Tech:* .NET Core, Angular, SQL Server, Entity Framework

EDUCATION & CERTIFICATION

- Tek-Up University

Tunis, Tunisia

Engineering Degree in Software Engineering and Information Systems

2023 – 2026
- Higher Institute of Technological Studies of Kélibia (ISET Kélibia)

Kélibia, Tunisia

Bachelor’s Degree in Information Systems Development

2020 – 2023

TECHNICAL SKILLS

- Languages:

Java, Python, TypeScript, JavaScript, C#, PHP, SQL
- Backend & APIs:

Spring Boot, Spring Security, Spring Data JPA, .NET Core, Django, FastAPI, Node.js, Symfony, Maven, REST APIs, Swagger/OpenAPI, JWT, RBAC
- Frontend:

Angular, React/Next.js, Vue.js, Bootstrap, Tailwind CSS
- DevOps & CI/CD:

Docker, Jenkins, GitLab CI/CD, SonarQube, Nexus, Trivy, Prometheus, Grafana, Ubuntu Server, Git
- Cloud (AWS, university labs):

EC2, Lambda, S3, S3 Glacier, EFS, RDS, VPC, Elastic Load Balancing, IAM, EKS
- Applied AI:

Local LLMs (Ollama), RAG, Text-to-SQL, Sentence-Transformers, Qdrant, Scikit-learn
- Databases:

PostgreSQL, MySQL, SQL Server, SQLite, MongoDB
- Quality & Methods:

Scrum/Agile, JMeter, OWASP ZAP, static analysis, N-tier and microservices architectures
